Deal Terms Summary:

Investment

- SAFE, Convertible Note, Common Shares or Preferred Shares?
- For common share deals, the valuation is a function of number of shares outstanding * price per share. That shares outstanding number is often pro forma'd for a ESOP pool (7-15% of the total shares out at the end of the round) and maybe some other things coming down the pipe (rare). To diligence this is at minimum the cap table, and ideally a representation letter from a lawyer stating the shares outstanding.

Summary of Deal:

- Confirm what entity we are investing in (ie. Drugbank is OMx Inc.)
- Deal Terms (include any restructuring, benchmarks, etc.)
- Identify non-standard inclusions
